You are free to:

Share — copy and redistribute the material in any medium or format for any purpose, even commercially.

Adapt — remix, transform, and build upon the material for any purpose, even commercially.

The licensor cannot revoke these freedoms as long as you follow the license terms.

Under the following terms:

 **Attribution** — You must give [appropriate credit](#), provide a link to the license, and [indicate if changes were made](#). You may do so in any reasonable manner, but not in any way that suggests the licensor endorses you or your use.

 **ShareAlike** — If you remix, transform, or build upon the material, you must distribute your contributions under the [same license](#) as the original.

No additional restrictions — You may not apply legal terms or [technological measures](#) that legally restrict others from doing anything the license permits.

Notices:

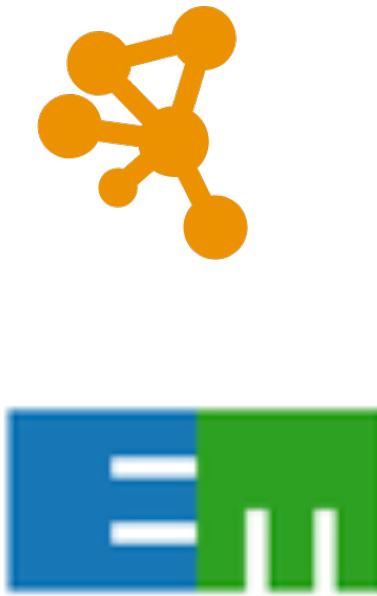

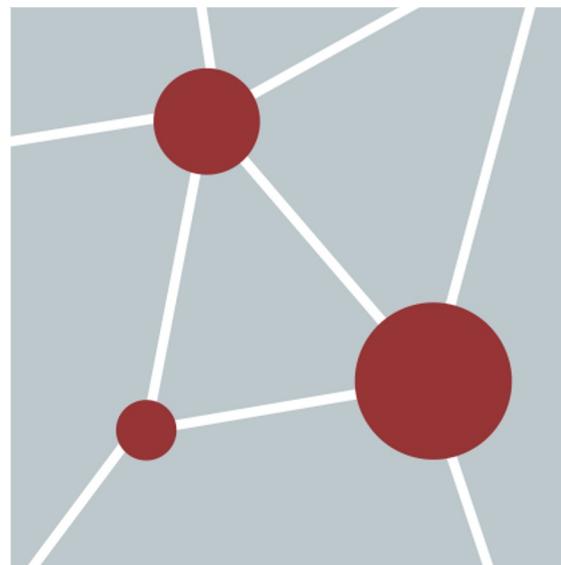

You do not have to comply with the license for elements of the material in the public domain or where your use is permitted by an applicable [exception or limitation](#).

No warranties are given. The license may not give you all of the permissions necessary for your intended use. For example, other rights such as [publicity, privacy, or moral rights](#) may limit how you use the material.

Module 3: Enrichment Maps

Ruth Isserlin
Pathway and Network Analysis
June 26-28, 2024

Learning Objectives

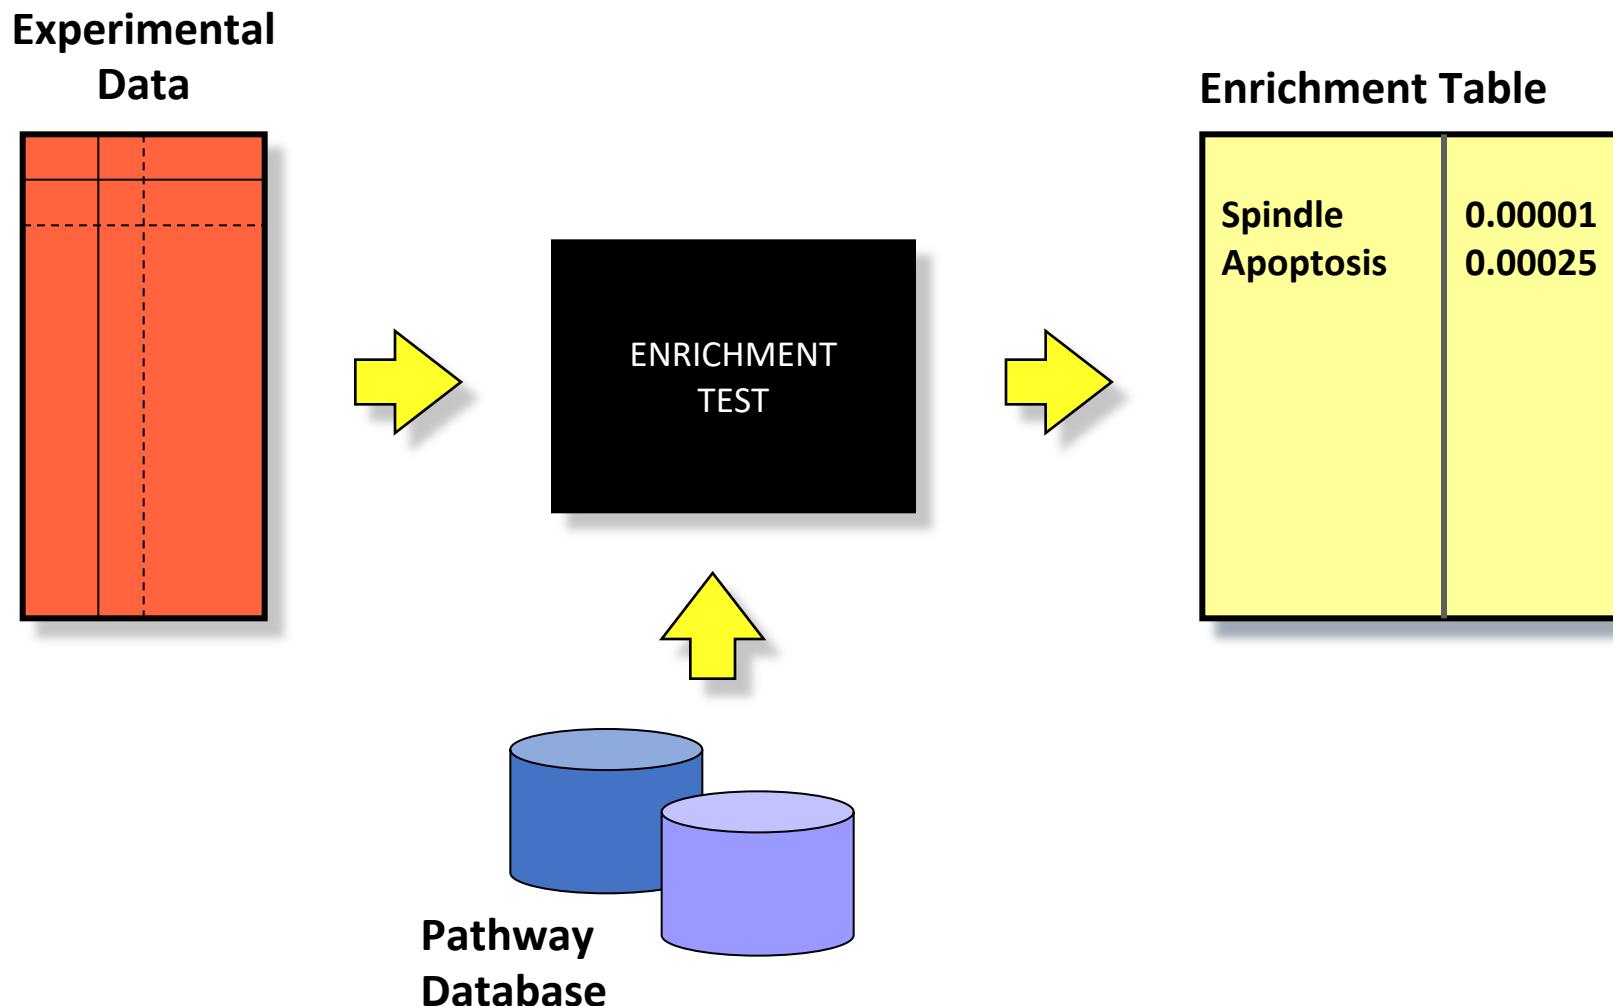

- By the end of this lecture, you will:
 - Understand how to transform your enrichment results from g:profiler, gsea or other enrichment algorithms to a Network
 - Understand the differences between a network and an Enrichment Map
 - Be able to summarize your enrichment results with annotation using the Autoannotate App.

Results of Lab 2 - Enrichment Results

- Over the years thousands of papers have been translated into digital representations as pathways or functional annotation.
- Enrichment analysis allows us to interpret data from these papers
- But Major cognitive burden relating overlapping information

Pathway Enrichment Test: General Framework

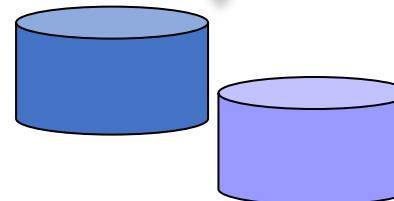

Pathway Enrichment Analysis

Ranked Gene List

GSEA

Pathways

g:Profiler

Thresholded lists (selected genes)

Enrichment in Condition A vs. B

Gene-set	Significance
Cell Cycle	0.0001
EGF Pathway	0.003
Spindle	0.007
...	...

Enrichment in Condition B vs. A

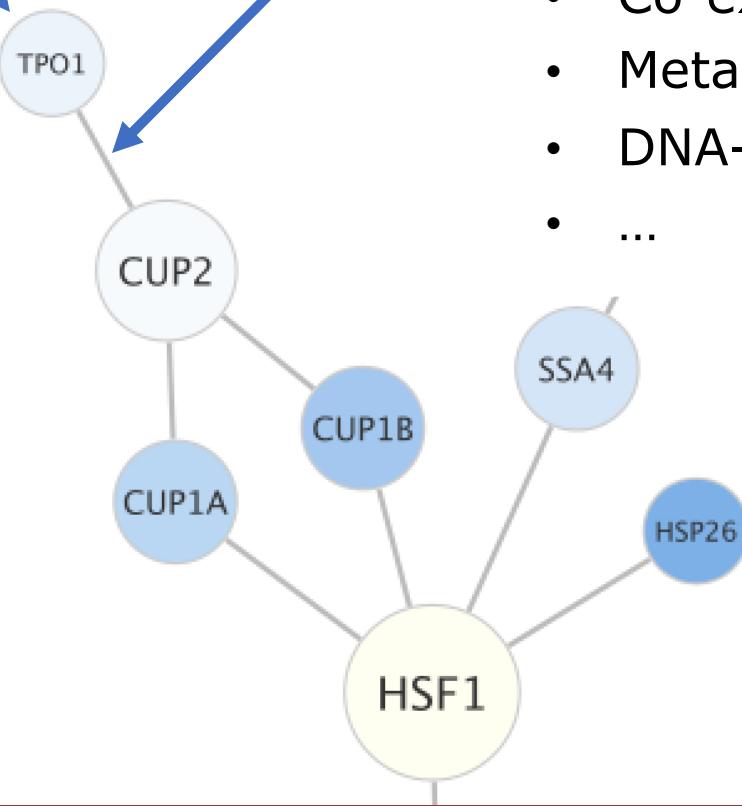

Gene-set	Significance
Proteasome	0.0002
Apoptosis	0.005
Caspase	0.009
...	...

Merico D, Isserlin R, Stueker O, Emili A, Bader GD
Enrichment map: a network-based method for
gene-set enrichment visualization and
interpretation PLoS One. 2010 Nov 15;5(11):e13984

Network Basics

Node (molecule/entity)

- Gene
- Protein
- Transcript
- Drug
- MicroRNA
- ...

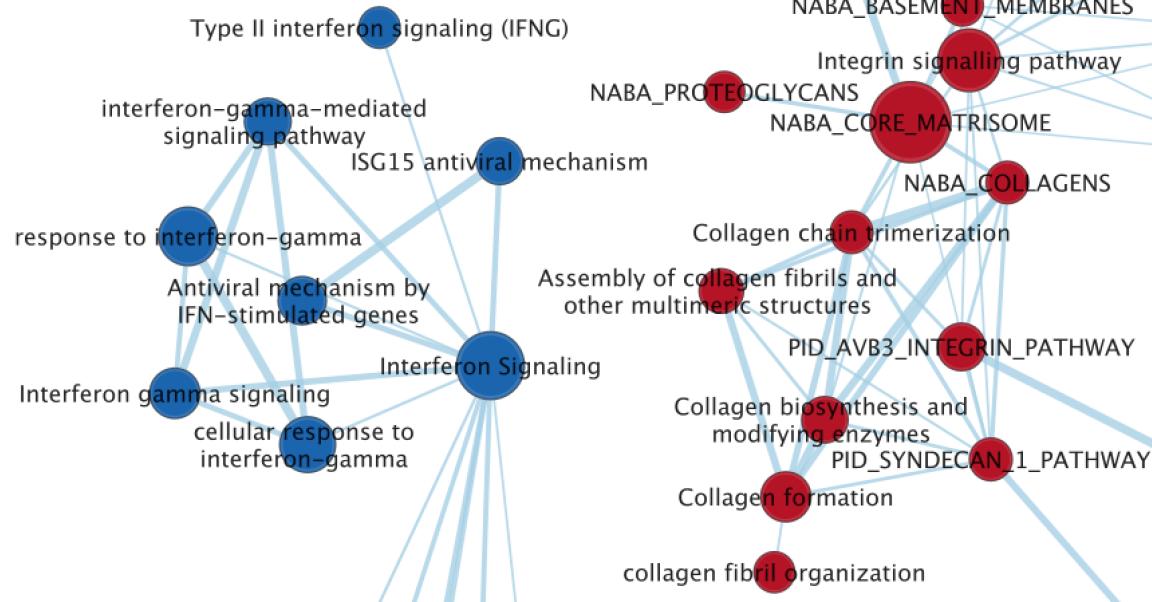

Edge (interaction/relationship)

- Genetic interaction
- Physical protein interaction
- Co-expression
- Metabolic reaction
- DNA-binding
- ...

Enrichment Map Basics

Node (molecule/entity)

- Pathway or geneset
- Size is correlated to number of genes in set
- Color indicates class in below example (for example Up/Down, classA/classB)

Edge (interaction/relationship)

- Degree of overlap between two genesets
- The more genes two pathways have in common the thicker/stronger the connection

Each row is a gene-set (pathway).

It displays:

- a score associated with the magnitude of overlap between gene-set and gene list.
 - a pvalue that estimates the significance of the enrichment (by chance or not).
 - a corrected pvalue (FDR) that corrects for multiple hypothesis testing.

Network Visualization

Enrichment Map: use case I

Single enrichment

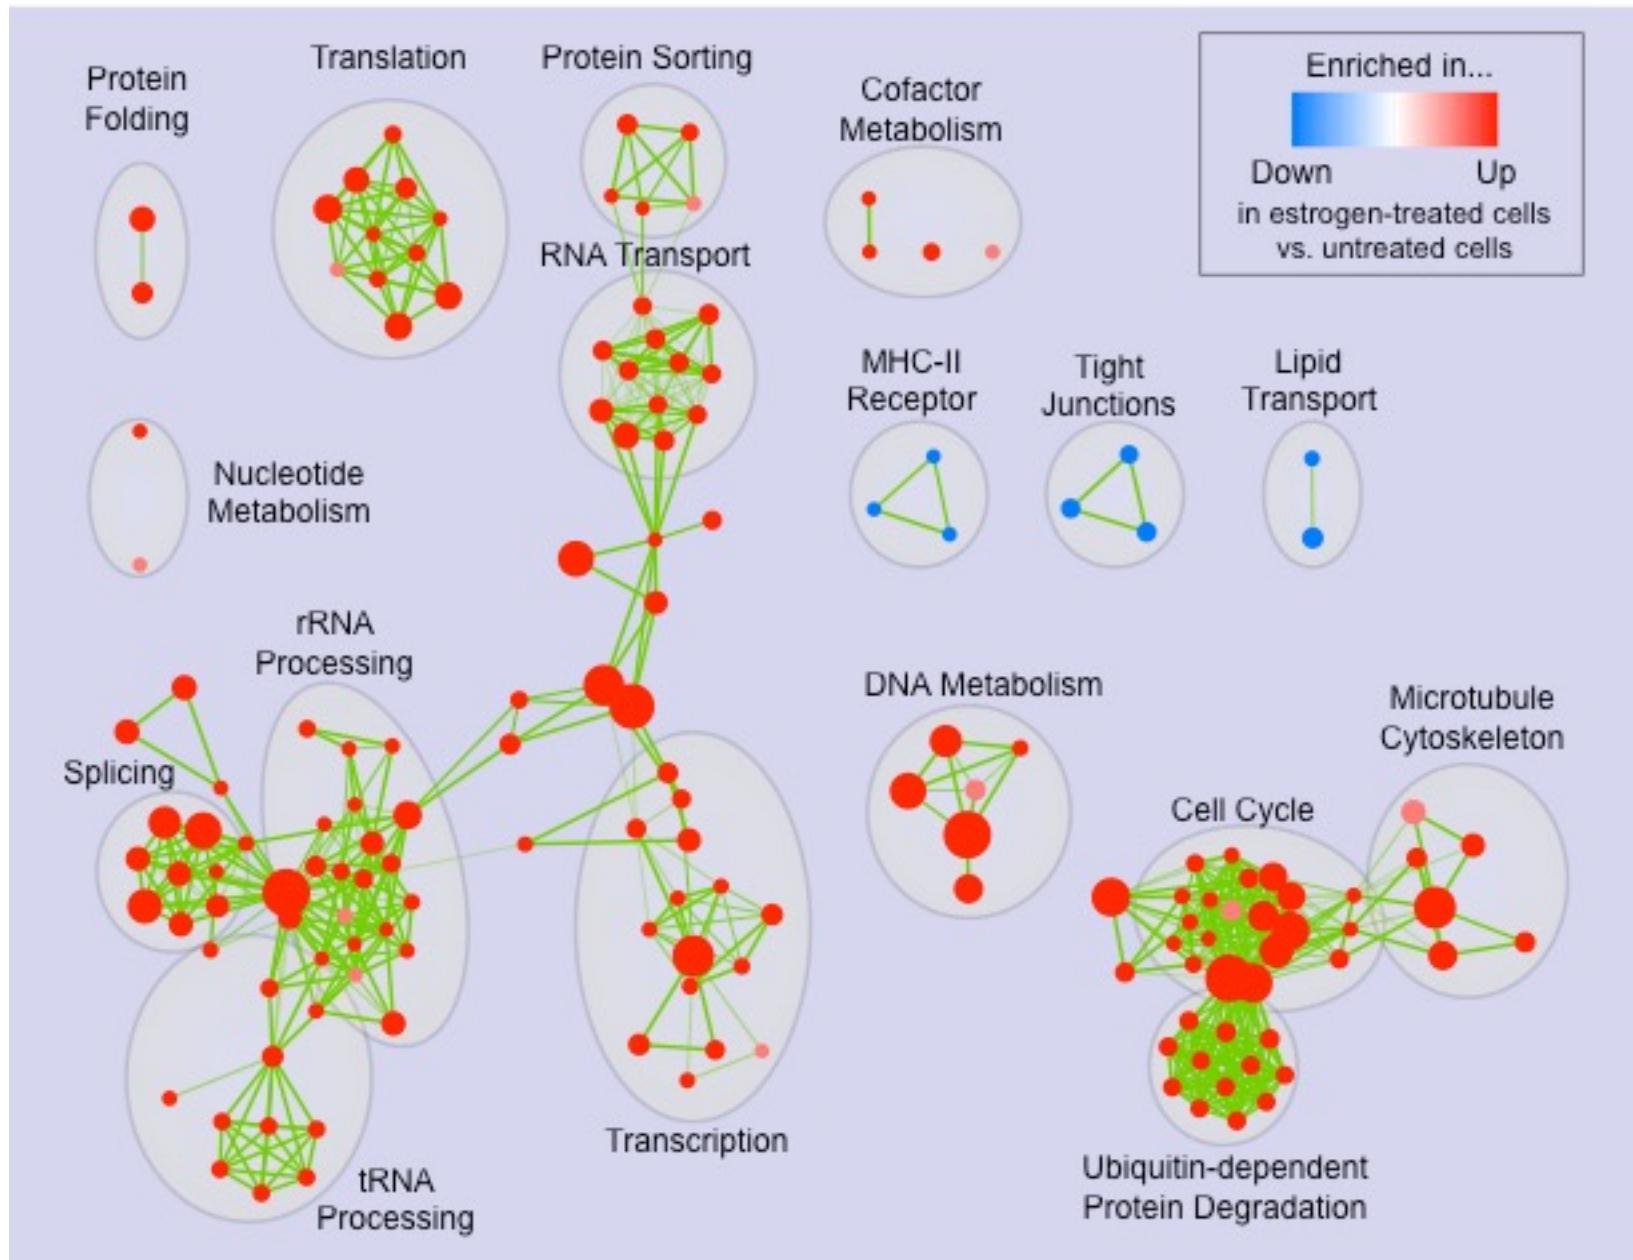

Estrogen treatment of breast cancer cells

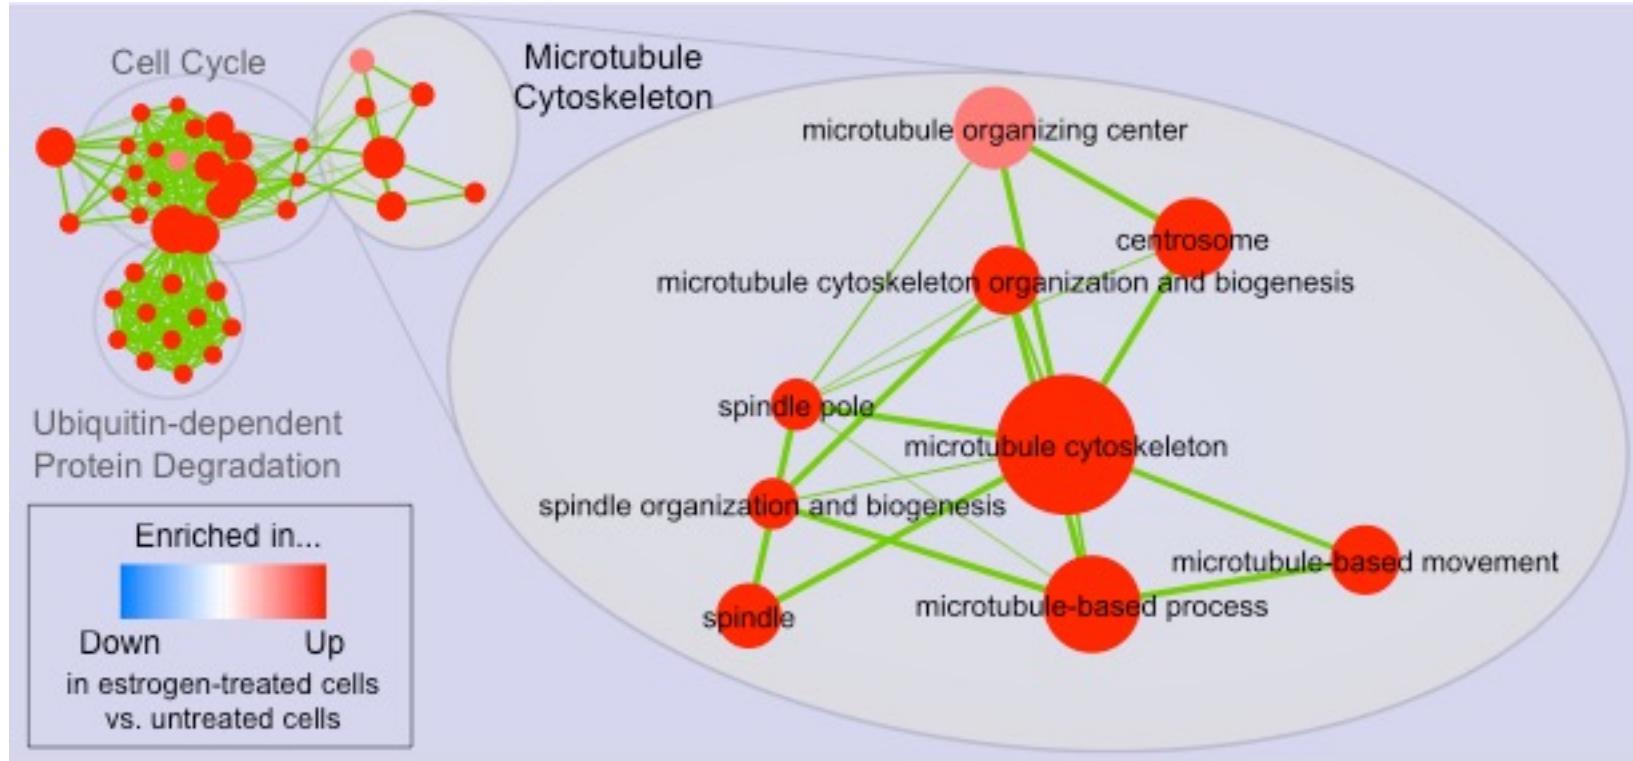

- Design:
2-time points, two-class

	12 hrs	24 hrs
Estrogen-treated	3	3
Untreated	3	3

- Gene set Database:
Gene Ontology

Lin C-Y, Vega VB, Thomsen JS, Zhang T, Kong SL, et al. (2007) Whole-genome cartography of estrogen receptor alpha binding sites. PLoS Genetics 3:e87

Enrichment Map: use case II

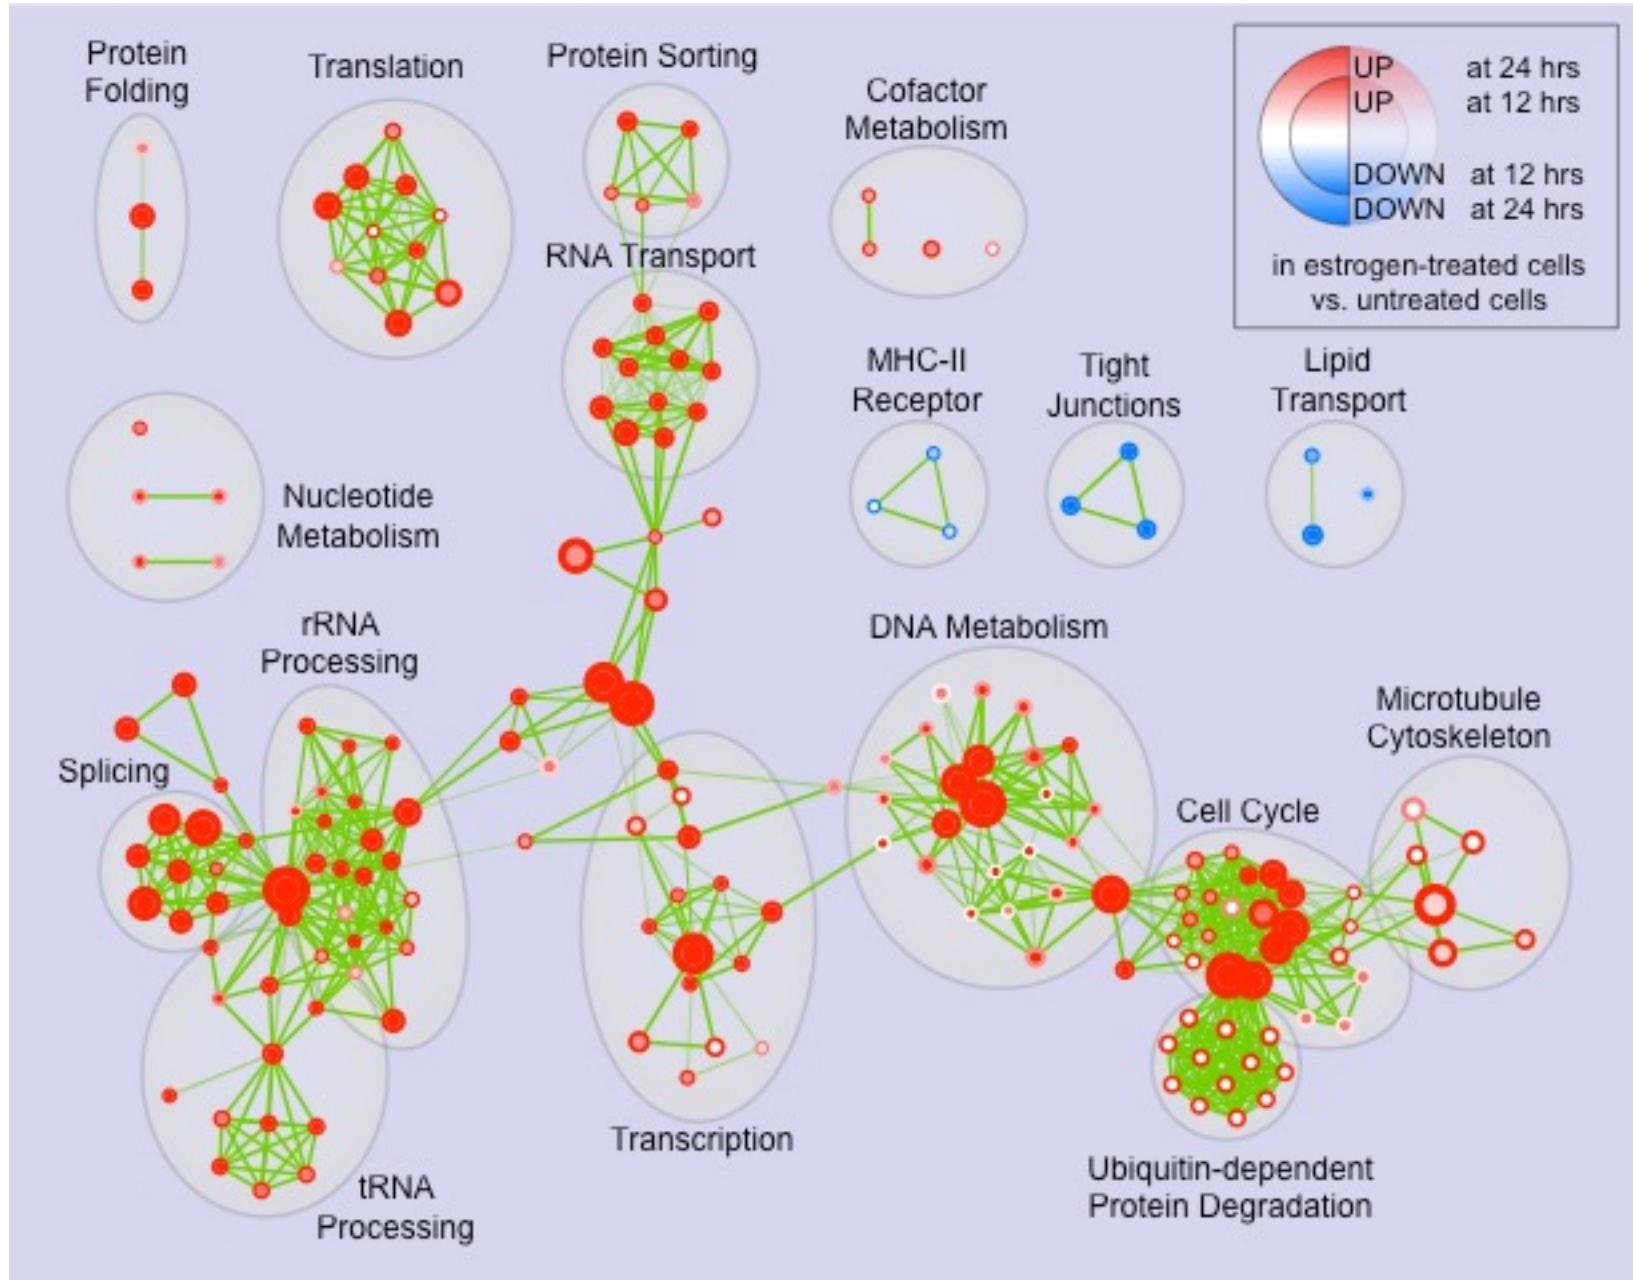

Comparison of two enrichments

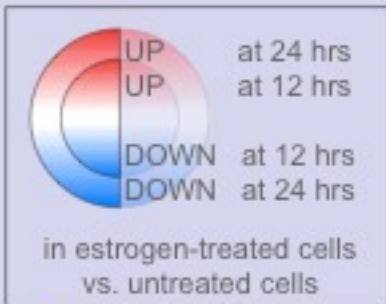

Estrogen treatment of breast cancer cells

- Design:
2-time points, two-class

	12 hrs	24 hrs
Estrogen-treated	3	3
Untreated	3	3

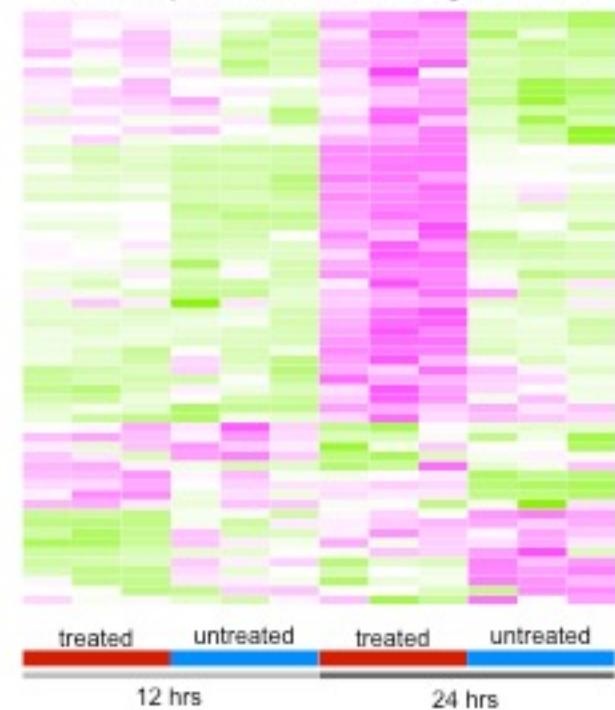

- Gene set Database:
Gene Ontology

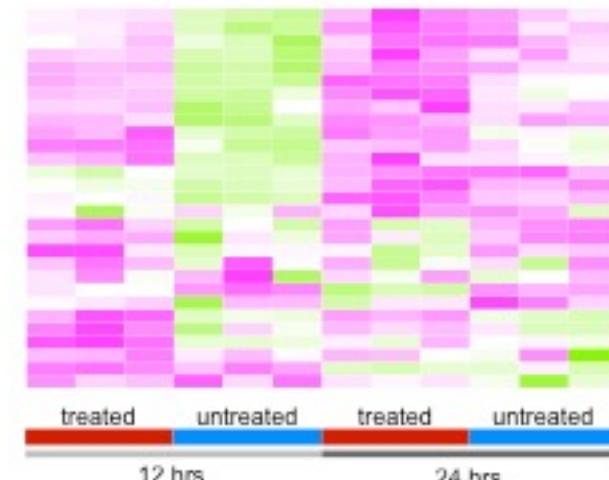

Estrogen-treated vs untreated:
■ Up
■ Down

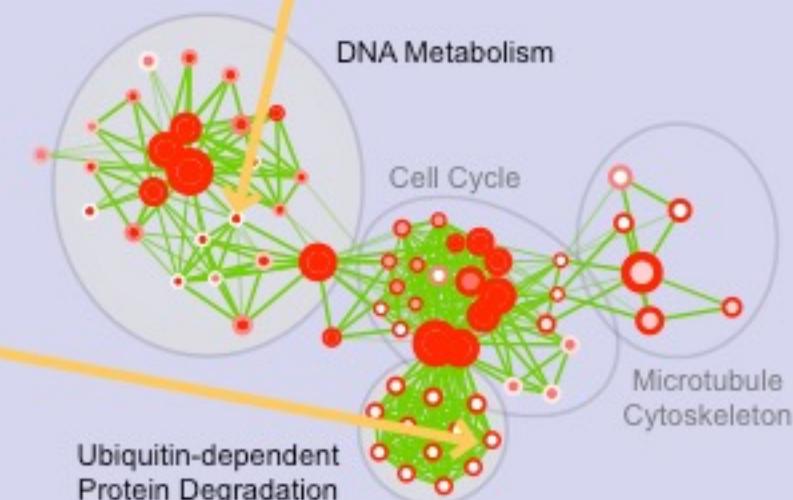

APC-dependent Protein Degradation

Replication Fork

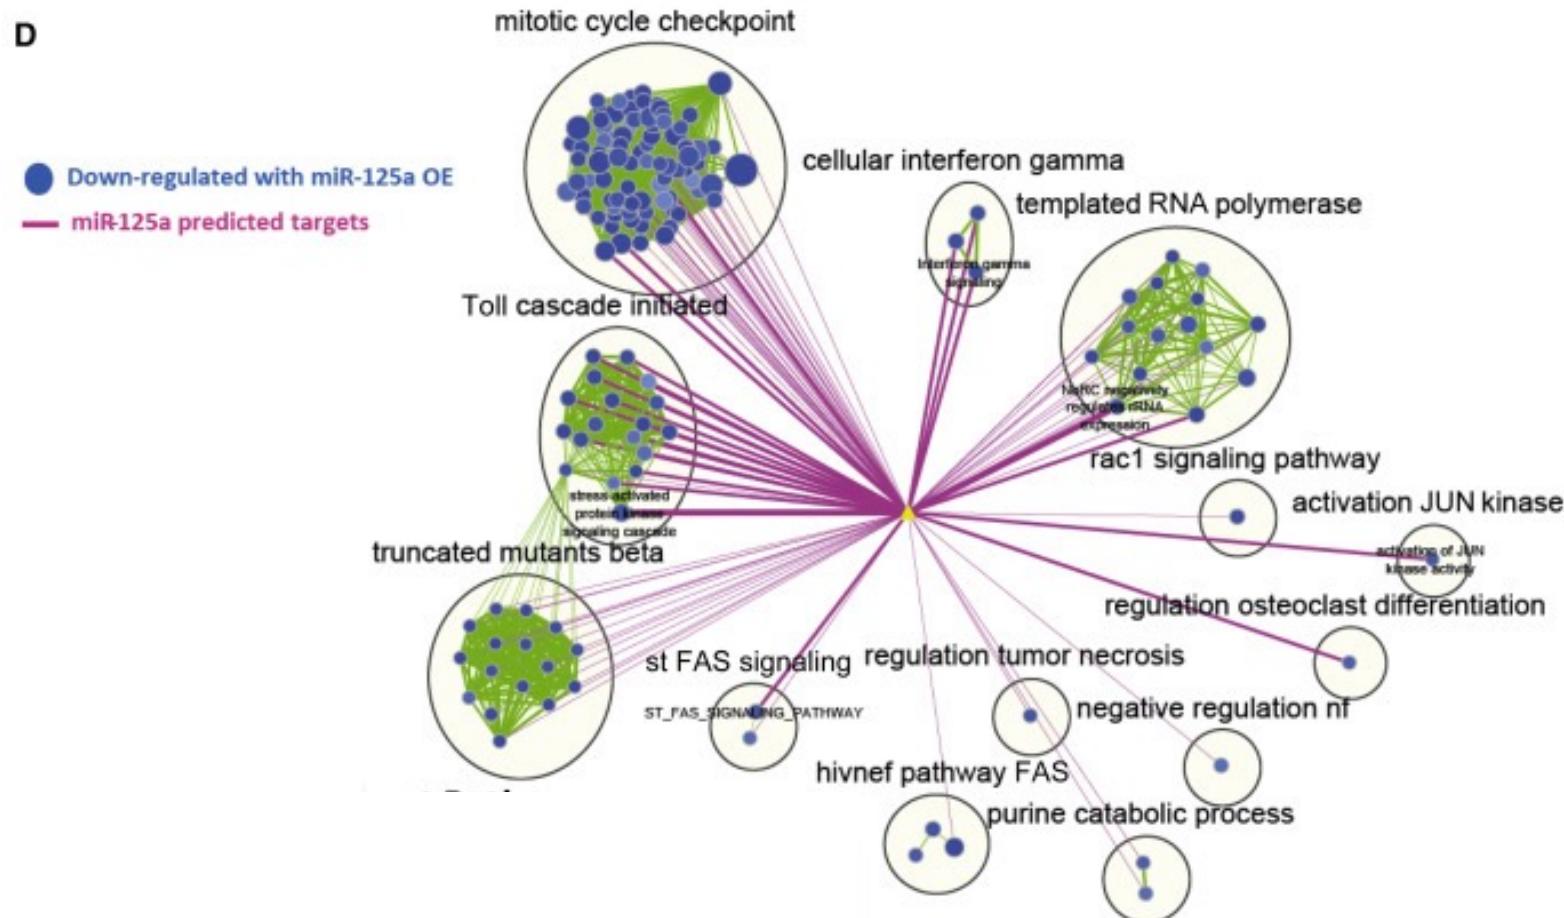

DNA Metabolism

Ubiquitin-dependent Protein Degradation

Enrichment Map: use case III

Query Set Analysis

Enrichment Map Features

Heatmap Panel

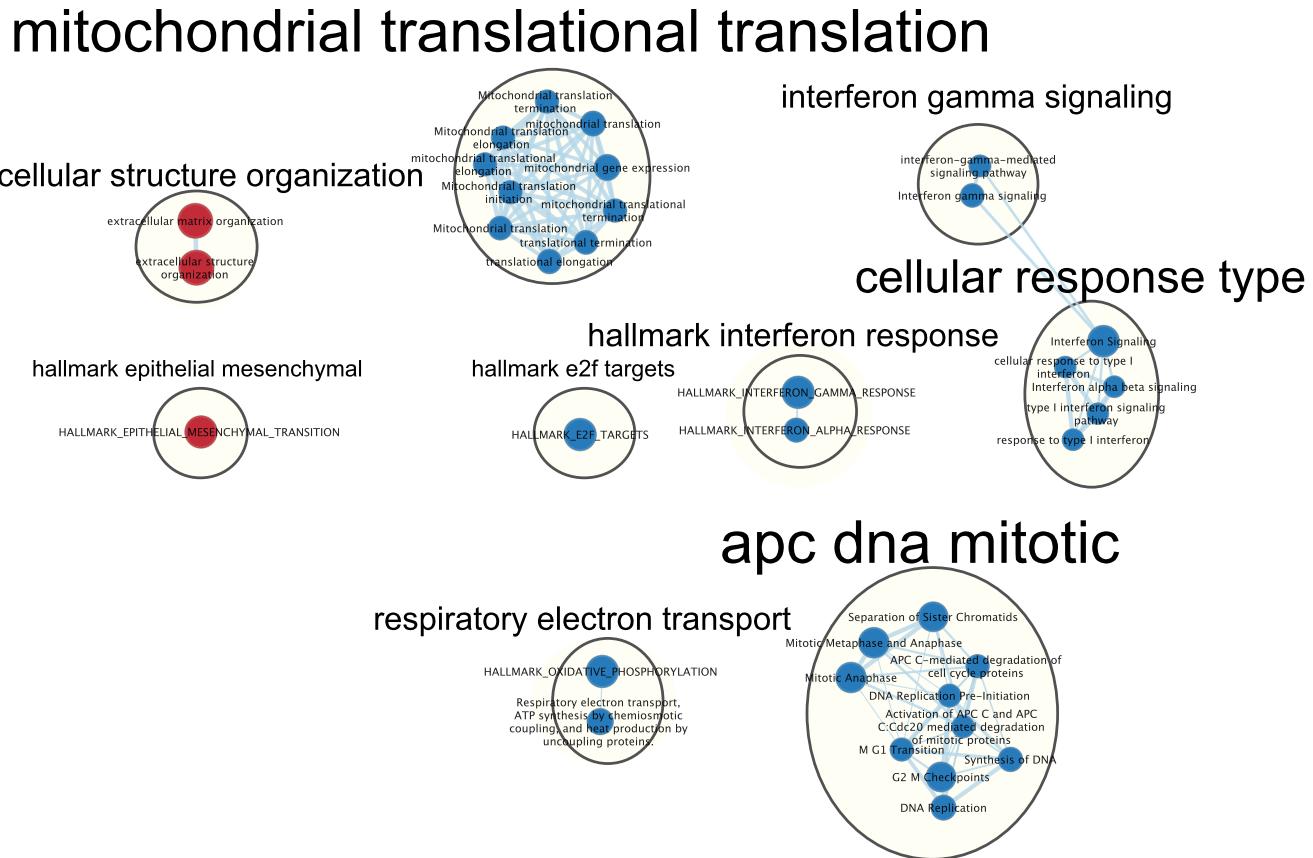

Enrichment Map Features

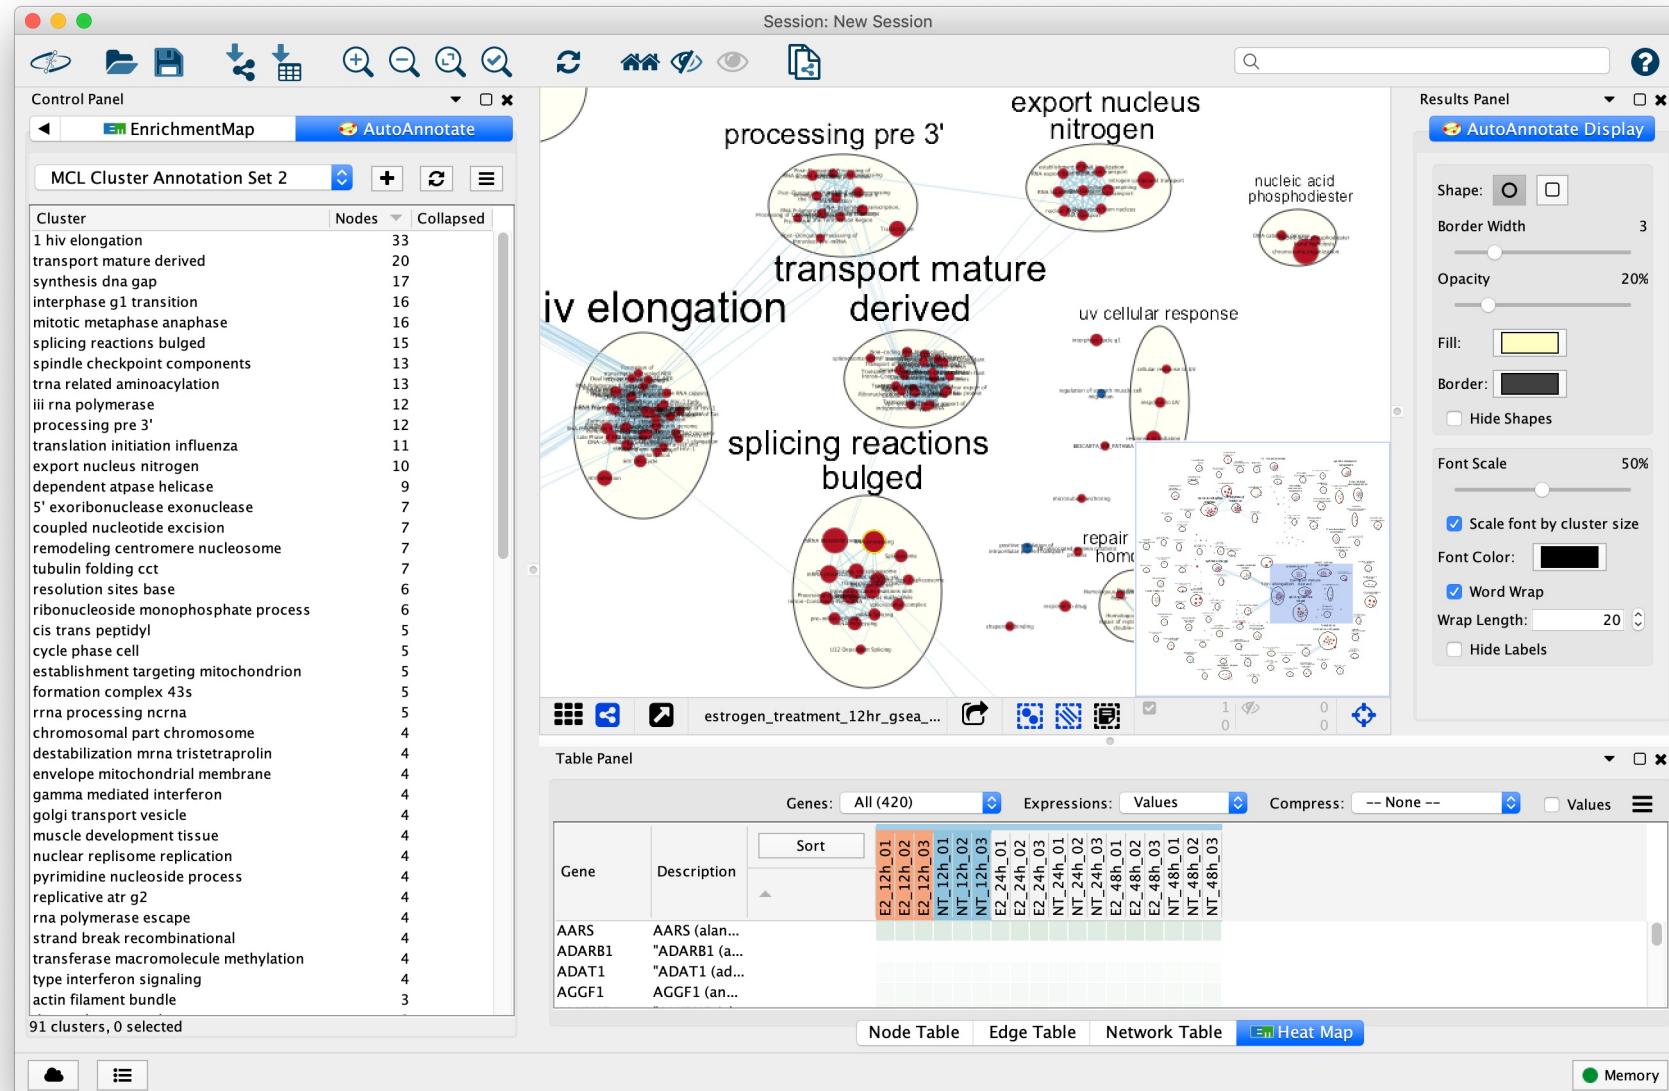

AutoAnnotate

Steps:

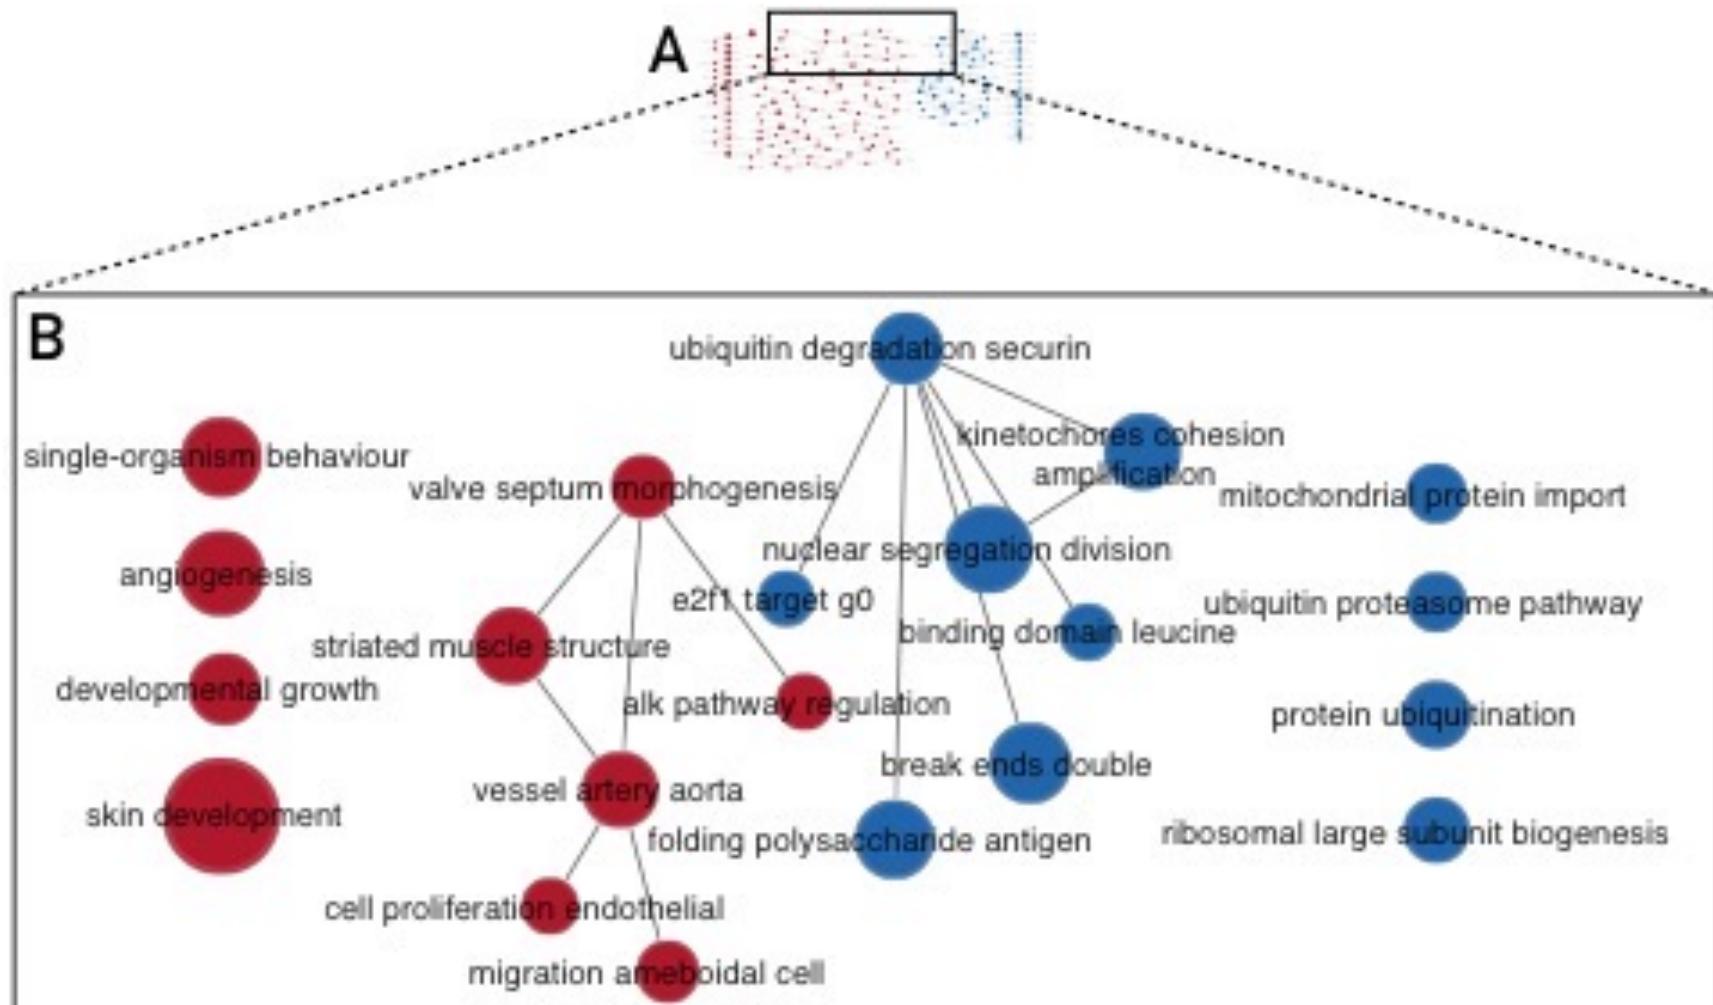

1. Cluster the Network
2. For each cluster, find frequent words in node labels
3. Select top 3 words to create labels
4. Possibility to move or edit labels to make figure publication ready.

AutoAnnotate

Collapsed network

Practical Lab

- Experiment with Cytoscape
- Try out Enrichment Map
- Load your g:Profiler results – and - load the GSEA enrichment analysis files that you generated in Module 2 lab
- Try out all the different Enrichment Map features
- Try AutoAnnotate to annotate your networks.

We are on a Coffee Break & Networking Session
